

Executing the American Heart Association's (AHA) strategic mission of "being a relentless force for a world of longer, healthier lives" requires reliable surveillance data to measure progress. The American Heart Association (AHA) is a leading national public health organization that has been instrumental in the development of the National Public Health Statistics Act (Public Law 106-56, 115 Stat. 2108) and the National Public Health Statistics Act (Public Law 106-56, 115 Stat. 2108).

Such a transformation could be strongly supportive of the surveillance requirements of CV included cardiovascular and other noncommunicable diseases and their determinants. Ac events and chronic disease management is fragmented and incomplete. These gaps have and effective local and national

Modernizing the public health surveillance
